SUMMARY

The records of the North Carolina State Archives have been searched in an attempt to determine the ancestors of both the HENRY LEE who lived in Bertie Co. and the HENRY LEE who lived in Gates Co. during the later part of the eighteenth century. As a result of this effort the most probable lineage, in the opinion of this author, is as shown in the following chart. The two HENRY LEEs are most certainly related. The chart shows the most likely way this occurs. Records which have survived are not sufficient to prove either line conclusively. Other genealogical tools, however, suggest the connections as shown.

INTRODUCTION

On July 8, 1986 an agreement was reached with officers of the HENRY LEE SOCIETY in regards to certain areas of research to be undertaken for the Society. The specific area of interest was to determine the ancesters of HENRY LEE who lived in Bertie Co. in the later part of the eighteenth century, married Sarah Sholar, and died in Guilford Co. This lineage had previously been researched by Reba Wilson and Betty Glover and was published in "The Lees and Kings of Virginia and North Carolina". These were the same officers of the HENRY LEE SOCIETY who approached this researcher to search the North Carolina State Archives in Raleigh, NC in order to verify or correct the lineages they had presented in their book. The first request was to establish or disprove that the JOHN LEE who lived in Onslow Co. in the later part of the eighteenth century was the father of the above mentioned HENRY LEE. This work, which showed conclusively that JOHN LEE of Onslow Co. was not the father of this HENRY LEE, was completed and a report of these findings submitted to Mrs. Wilson, genealogist for the HENRY LEE SOCIETY.

Having disproved this connection the next request was to attempt to find the correct ancestors for HENRY LEE, starting with his father and working back as far as available records would permit. A second request was to determine the ancestors of another HENRY LEE who lived in Gates Co. at the same time as did the HENRY LEE in Bertie Co. This report is the culmination of approximately 150 hours spent searching records available in the North Carolina State Archives. The lineage of the HENRY LEE who lived in Bertie Co. is shown through three previous generations with a high degree of probability of being correct. The HENRY LEE who lived in Gates Co. is shown to probably have these same ancestors, however, the connection is not as good because of missing records.

I

In 1675 JOHN LEE patented 100 acres in the Upper Parish of Nansemond Co. VA adjoining land formerly Michael Hills, but now seated by Francis Sanders; adj. Mr. James Peters and Captain John Mason near the cart path and Isens Mill. The patent does not describe the location of the land in Nansemond Co. The location of land on which John Mason, Michael Hill and Francis Sanders, all neighbors of JOHN LEE, lived is known from other patents. All of these had land on the western branch of Nansemond River before and after 1675. The 100 acres patented by JOHN LEE must have also been on this western branch. This is the branch of Nansemond River which flows westward from present day Suffolk City. A patent to Richard Sanders in 1680 was in Nansemond Co. at the head of Capt. John Mason in the western branch adj. Michael Hill; now said Sanders land. A patent to John Mason in 1661 was for land at the south side of the western branch of Nansemond River beg. at a swamp... Another patent to John Mason in 1664 was at Miles end of his own land and Michael Hill. These patents are sufficient to locate the 100 acres of land patented by JOHN LEE in 1675.

In 1694 JOHN LEE patented 960 acres of land in the Upper Parish of Nansemond Co., VA on the east side of Somerton Creek. The land began at a small island on the side of Somerton Creek and extended to the northeast side of Cypress Swamp. In 1703 WILLIAM KING patented 541 acres in the same area. His patent was on both sides of Kings Branch, a branch of Cypress Swamp. Also in 1703 a patent to Thomas Milner was for land on the north side of Cypress Swamp, a branch of Somerton Creek adjoining JOHN LEE on King's branch, a corner of William King. These three patents are sufficient to pinpoint the location of the patent to JOHN LEE. The area where William King and his descendants lived in the Cypress Swamp area is already known through previous research. The area where JOHN LEE obtained land is shown as (1) in Figure 1. This area is approximately 5-6 miles due south of where JOHN LEE

patented land on the western branch of Nansemond River.

The small island on the east side of Somerton Creek at this location is still shown on current topographic maps published by the U. S. Geological Survey. The map which includes this area is the one of the Riverdale Quadrangle. The creek or swamp which was referred to as Cypress Swamp in the above patents is present on the topographic map but is not named. It is south of Somerton Creek just below the island mentioned and flows into Somerton Creek. It is approximately 1 mile east of Chowan River. It is the only stream on the south side of Somerton Creek between the Chowan River and Beaverdam Creek. This creek is also present on a map of the Chowan River Basin prepared by the North Carolina Department of Water and Resources. On this map it is referred to as Laster-Jordan Branch. The swamp, or stream, is shown but not named on maps of Gates Co. currently available from the North Carolina Department of Transportation. There is no doubt that this stream shown on current maps was known as Cypress Swamp in 1694 and throughout the eighteenth century and that JOHN LEE's patent has been correctly located.

Two other patents were issued to JOHN LEE in the Somerton Creek area. In 1714 he patented 50 acres on the west side of Somerton Creek. The description of this patent would indicate that it was between Somerton Creek and the Chowan River. In 1720 he patented 247 acres near Somerton Creek. The description of these two patents would indicate that they were near the 1694 patent. It could not be determined if they joined the land patented in 1694. JOHN LEE's land is mentioned in several Virginia land patents to others. These are listed in TABLE I. Interestingly, he is also mentioned in a North Carolina patent to Thomas Spites in 1719. The land being patented by Spites also adjoined Paul Pender and Beaverdam Creek. The fact that his land adjoined JOHN LEE would show that JOHN LEE was just on the Virginia side of the line dividing North Carolina and Virginia. When the dividing line was surveyed and moved further north in 1728 the land mentioned in the 1694 patent was mostly in North Carolina. The location of the other two patents were probably at

least partly in Virginia as there appear to be LEE's living on both sides of the line for the remainder of the eighteenth century. It should be mentioned that William King and his descendants lived on the same land adjoining Cypress Swamp and on additional land that they acquired throughout the remainder of the eighteenth century as neighbors of JOHN LEE and his descendants. The proximity of these two families will be of importance when certain connections are later made.

It is not possible to determine if the patents in 1675 and 1694 were to the same JOHN LEE or even if they were to father and son. The pattern of first patenting land along the Nansemond River and then moving further south into the Somerton Creek and North Carolina area has been observed for a large number of early settlers. This could also have been true for JOHN LEE. The association between time, name and location would infer that there was probably a connection. The JOHN LEE who patented land in 1675 could possibly but not likely be the one who patented land in 1720. There appear to be at least two generations of JOHN LEEs.

In 1795, after the area south of Somerton Creek was a part of Gates Co., a deed was issued between Uriah Odom and John Odom to Jethro Sumner of Nansemond Co., VA. One of these two parcels of land was described as being "formerly surveyed for Richard Saunders by patent dated 1 April 1717 which may appear upon records in Virginia joining JOHN LEE the elder, the younger JOHN LEE and Paul Pender." This important bit of information indicates that there were two JOHN LEEs living on adjoining land in 1717 and that they were probably father and son. As the land adjoins Paul Pender it was probably part of the land patented by JOHN LEE in 1694. The location of Paul Pender's house was located precisely by the surveyors of the line between North Carolina and Virginia in 1728 and will be shown later. It was in the area previously shown in Figure 1 for the location of JOHN LEE's patent. By 1717 two generations of JOHN LEEs have been identified. This might or might not include the JOHN LEE who patented land in 1675. The presence of the two JOHN LEEs would lend credence to the probability the JOHN LEE of 1675 is related to those coming later.

later. I know of no way to absolutely resolve the issue except to note at least two and possibly three generations of JOHN LEEs in 1717.

II.

When the dividing line between North Carolina and Virginia was surveyed in 1728 a record of the progress made, distances between various places and the location of the homes of people living near the line was made. This report by the surveyors has been published in Volume II of "The Colonial Records of North Carolina". A copy of this report may be found at the end of this chapter. The information in this report has served to pinpoint the location of roads, bridges, swamps, creeks, etc. as they existed in 1728. The report also shows where several of the early settlers lived. I have taken the information of this report and placed it on a current map of the dividing line between the two states. This undertaking is Figure 2. I have only included that part of the line that is of current interest. By way of explanation the surveyors started at a point designated D^{o} and made measurements of distance from D^{o} at points along the line. Distances measured were in chains (1 chain is 66 feet). Several significant observations can be made- what is today known as Mills Swamp was known as Beach Swamp in 1728. It crosses the dividing line at the same points now as it did then. The survey also served to pinpoint the location of Dukes Mill, of Roads leading from it and crossing the dividing line and the homes of those living near the line. Some of the roads mentioned are still in use today and in approximately the same location. Beaverdam Swamp is located and it is at precisely the same location then as now. The same for Somerton Creek which now crosses the dividing line at the precise point it did in 1728, that is 913 chains from D^{o}. The most significant information from our viewpoint is that it pinpoints precisely the homes in which Paul Pender and RICHARD LEE lived. These are shown on Figure 2 (p. 19) and are on the Virginia side of the line. This is the first indication of a LEE other than JOHN LEE living in this area. The location of RICHARD LEE's home appears to be on land patented by JOHN LEE in

1694. And as described in earlier patents it adjoins Paul Pender. The inference is that RICHARD LEE is a son of JOHN LEE who obtained the original patent.

Continuing further along the line Blackwater River is finally reached. As the line continues west from Blackwater River and Chowan River and shortly after crossing Nottaway River the house of another JOHN LEE is pinpointed. This is only a short distance on the west side of Chowan River and is on the North Carolina side of the dividing line. This could not be the location of the JOHN LEE patent in 1714 which describes the location as being on the west side of Somerton Creek. This location would most certainly be described as being west of Chowan River or south of Nottaway River. These are much larger and more significant bodies of water. One possibility is that this is the location of a North Carolina land patent to JOHN LEE in Bertie Co. in 1723. This could only be possible if the dividing line between the two states was not moved north in this area as it was on the other side of Chowan River. The fact that the dividing line is further south here would tend to bear this out. It is interesting to note that "as a crow flies" that this location and the location of the homesite of RICHARD LEE on the east side of Somerton Creek are only between 2 and 2½ miles apart. It is even closer to other parts of the JOHN LEE patents. And the 1714 patent to JOHN LEE west of Somerton Creek could be in between. The close proximity of these areas would lend credence to the assumption that all the LEE's mentioned are closely related.

III.

As previously mentioned the area south of Somerton Creek and east of Cypress Swamp where JOHN LEE the elder and the younger JOHN LEE lived was a part of Virginia until 1728. Even after 1728 a part of the land upon which the LEE's lived was still in Nansemond Co., VA. The only records available for this period are the land patents. There could have been other land transactions between individuals but these early records have been destroyed. After 1728 the area in North Carolina in which the LEEs lived was in Chowan County. This area remained in Chowan Co. until 1760 at which time it became a part of Hertford Co. No records are available for Hertford Co. prior to the Civil War. In 1779 Hertford Co. was further divided and that part of Hertford Co. east of Chowan River became a part of Gates Co. The records for Gates Co. are relatively complete. There is an interval of about 20 years between 1759 and 1779 in which no records of the Somerton Creek area exist.

The Chowan Co. records which are available in the North Carolina State Archives have been searched thoroughly for the period from 1728 to 1760. These records indicate that JOHN LEE lived continuously in the area up until the time Hertford Co. was formed. He was even one of those petitioning for the formation of a new county. The information covering Chowan Co. is found in TABLE I. Not only is a JOHN LEE living in the area continuously, but from 1754 to 1759 there is a JOHN LEE and a JOHN LEE JUNR. As will be shown later there appears to be at least three generations of JOHN LEEs by 1754. In 1736 JOHN LEE was on a jury to lay out a road from the Virginia line to Maney's Ferry on the Chowan River. This road most likely went across land on which JOHN LEE lived. JOHN LEE is on the tax lists of Chowan Co. continuously from 1740 to 1759 when Hertford Co. was formed. The tax lists are not complete for each year and some years do not give the number of taxables. And again in some years the white polls and black polls are grouped together. As an example, he has 2 taxables in 1752 and 5 taxables in 1753. Then in 1756 the list shows 2 white and 2 black taxables. Because these are grouped

in some years it cannot be determined how many white taxables are included in the 1753 listing. In addition to these listings JOHN LEE proved a deed in 1751, was on the jury in 1752, was involved in a court case with Thomas Riddick in 1755, and was again on a jury laying out a road in the same area as before in 1757. He was summoned to answer a bill of indictment in 1758.

There are a few references in the Chowan Co. records for LEE's other than JOHN LEE. In 1725 WILLIAM LEE witnessed a deed in which Charles King bought land from John Daverson. This land was on King's branch of Cypress Swamp joining Col. Milner and was thus in the same area where JOHN LEE lived. WILLIAM LEE appears to be a son of JOHN LEE. GODFREY LEE appears on tax lists of Chowan Co. in 1740 and 1741, but not thereafter. Other records will show that he is also a son of JOHN LEE.

In 1754 two land transactions occured in Chowan Co. relating to the 1694 land granted JOHN LEE. In one transaction WILLIAM LEE of Bertie Co. sold SAMUEL LEE, son and heir of GODFREY LEE of Northampton Co. 100 acres of land in Chowan Co. on the north side of Cypress Swamp-it being part of a tract of land granted to JOHN LEE. In the second transaction JOSHUA LEE of Edgecombe Co. sold SAMUEL LEE of Northampton Co. 100 acres in Chowan Co. beginning upon the land that was GODFREY LEE's corner, then to Cypress Swamp and down the swamp to the beginning being part of a patent formerly granted to JOHN LEE bearing date April 7, 1694.

In 1756 SAMUEL LEE appears to sell at least part of the land he purchased two years earlier. In 1756 JOHN LEE and SAMUEL LEE sold to John Minshew 160 acres in Chowan Co. - being part of a tract of land granted by patent to JOHN LEE dated 1694 at Cypress Swamp on eastermost side to a line of marked trees between the said JOHN LEE and John Minshew.

The above deeds establish that GODFREY LEE, JOSHUA LEE and WILLIAM LEE are descendants, most likely sons, of JOHN LEE who patented land on the east side of Cypress Swamp in 1694. The presence of RICHARD LEE on the land in the 1728

survey and the continuous presence of a JOHN LEE would indicate that they are also sons. Indications are that JOHN LEE who patented land in 1694 had five sons who inherited the land. The probable lineage is shown in Figure 3 along with other connections that will be later disclosed.

Also, beginning in 1754, there is a JOHN LEE and a JOHN LEE JUNIOR present. JOHN LEE LUNIOR is listed as a taxable as early as 1754. In 1754, JOHN LEE, JOHN LEE JUNIOR and HENRY LEE are members of the militia company of Capt. Charles King. The area served by this company is the same area south of Somerton Creek on which the LEE's lived. Capt. Charles King is in fact a neighbor, the son of William King who patented land on Cypress Swamp in 1703. JOHN LEE JUNIOR and HENRY LEE appear to be sons of JOHN LEE and JOHN LEE JUNIOR is probably the older of the two sons as he appears as a taxable and HENRY LEE does not. In fact HENRY LEE appears only one more time in the records of Chowan Co. In 1759 he and JOHN LEE were listed with those who petitioned the governor of North Carolina for a new county to be formed which would include the western part of Chowan Co. Although appearing only twice in the records it can conclusively be shown that HENRY LEE who signed the petition and who was surely the one in the militia is the HENRY LEE who later lived in Bertie Co., married Sarah Shoalar, and became the father of ABIGAIL LEE who married William King in 1791. The original documents pertaining to the petition for forming a new county are to be found in the North Carolina State Archives. These have been examined and the signature of HENRY LEE compared with the signatures of HENRY LEE of Bertie Co. These were as bondsman on the marriage license of William King and ABIGAIL LEE and on the will of HENRY LEE in Guilford Co. in 1803. The signatures are identical. Signatures were also obtained of the HENRY LEE who lived in Gates Co. in the later part of the eighteenth century. These were not the same signatures as those on the 1759 petition. When HENRY LEE first bought land in Bertie Co. in 1763 the deed states that he was from Hertford Co. The area where the LEE's lived on Cypress Swamp and south of Somerton Creek was a part of

Hertford Co. in 1763. The evidence appears conclusive that HENRY LEE of Bertie Co. is the son of JOHN LEE of Chowan, later Hertford Co. This will be more thoroughly explored later.

One other record of land transactions involving the LEE's is found in the Gates Co. records. In 1792 William Odom gave his son, John Odom, the plantation on which he lived that he purchased of SAM LEE. If you remember SAMUEL LEE purchased two parcels of land from two of his uncles in 1754. He sold part of this in 1756. This deed could refer to sale of the remainder of the land. Except for the land purchases and sales SAMUEL LEE does not appear in the records of Chowan Co.except during the two year period 1754-1756. No tax list for 1755 was available.

IV

Descendants of JOHN LEE lived in two other areas not too far distant from where he patented land in 1694. Both of these areas were on the west side of Chowan River. They were in areas that became a part of Hertford Co. in 1760. A study of the records available for these areas enables us to establish the connections of the LEEs in these areas to JOHN LEE. Also it must be remembered that the HENRY LEE for whom we are attempting to find his ancestors came from Hertford Co. in 1763 and bought land in Bertie Co.

The first area of interest is just west of the Chowan River and almost directly west of where JOHN LEE lived on the east side of Cypress Swamp, on the south side of Somerton Creek. The area in question is on Indian Creek which flows into Chowan River and is just south of the dividing line between Virginia and North Carolina. The area is only a few miles distant from Cypress Swamp and could almost be considered an extension of this area except that it is in a different county. On current topographic maps this area is referred to as Maney's Neck, probably because James Maney who operated the ferry on Chowan River was also a merchant with extensive land holdings in the area. The present day site where the ferry crossed is known as Riddicksville. The area on Indian Creek is near the Virginia line and has previously been located on Figure 1 by (2).

A large number of settlers from Chowan Co. in the area of Cypress Swamp and Somerton Creek obtained land patents on the west side of Chowan River in 1723. It is not known why this influx of settlers occured at this particular time. Among those obtaining patents in 1723 were GODFREY LEE and JOHN LEE. These were North Carolina patents, not Virginia patents even though they were close to the present dividing line. The inference is that the dividing line was the same in 1728 as it was before the survey.

A number of patents and land transactions have been located for this area which was a part of Bertie Co. until 1741 and then a part of Northampton Co. until 1760. After 1760 it was a part of Hertford Co. for which no records are available. These land transactions have been listed in TABLE II. These transactions mention the north side of Indian Creek and the Virginia line. It is very likely that the JOHN LEE mentioned in the surveyors report is the same JOHN LEE who obtained a patent on Indian Creek in 1723. The surveyors report serves to further pinpoint the location of the patent. It has already been mentioned that the home of JOHN LEE here is only about 2 miles from the home of RICHARD LEE on the east side of the river.

GODFREY LEE appears to be in the area continuously. He sold 270 acres of land to RICHARD LEE, presumabley his brother, in a deed witnessed by JOHN LEE. This was in 1734. RICHARD LEE sold this same 270 acres in 1739 and appears to have moved to Edgecombe Co. as a RICHARD LEE appears in Edgecombe Co. about this time.

Also in 1739 JOSHUA LEE and wife MARY sold land in Bertie Co. on Indian Creek and they too appear to move to Edgecombe Co. RICHARD LEE and JOSHUA LEE appear to be brothers who moved in the same year to the same location. The land sold by JOSHUA LEE is described as being part of a patent granted JOHN LEE in his last will and testament to JOSHUA LEE his son. This establishes that JOHN LEE was dead by 1739. He is selling land he patented in 1723. It has already been mentioned that in 1754 JOSHUA LEE of Edgecombe Co. sold land in Chowan Co. that was part of the land patented by JOHN LEE in 1694. Because JOSHUA LEE sold land on Indian Creek that he inherited from JOHN LEE and land on Cypress Swamp in Chowan Co. that was granted to JOHN LEE in 1694, the inference is that this is the same JOHN LEE in each case. It also tends to establish that the JOHN LEE who was dead by 1739 was the one who obtained the 1694 patent. This being the case he could almost surely not be the JOHN LEE who patented land

in 1675 as he would be extremely old by 1739. If there is a connection between the JOHN LEE patentees of 1675 and 1694 they would have to be of two generations, that is father and son.

From the Northampton Co. deeds relating to the area we learn that JOHN LEE had a daughter, MARY LEE, who married Thomas Thorn. We also learn that GODFREY LEE's wife was SARAH LEE and that GODFREY LEE was dead by 1749. His children were SARAH LEE, SAMUEL LEE, and ANNE LEE. This is the same SAMUEL LEE who bought land from other LEE's in Chowan Co. in 1754. GODFREY LEE's wife SARAH married Joseph Scott after his death.

These records along with information already presented from Chowan Co. records is sufficient to identify GODFREY, RICHARD, JOSHUA, MARY, and JOHN as children of JOHN LEE who patented land in 1694. WILLIAM LEE has also made brief appearances and is most likely another son. He lives in another area and will be more fully discussed later.

There are other LEEs mentioned in the records of Northampton Co. for the period from 1747 to 1757. None of these appear to be in the Indian Creek area. A JOHN LEE from Surry Co. purchased land on the north side and joining Meherrin River. This would be several miles from the Indian Creek area, but would have been a part of Northampton Co. that became Hertford Co. Also a HENRY LEE from Surry Co. bought land in Northampton Co. in 1747 and sold it in 1751. This land was in the western part of Northampton Co. in an area that did not become a part of Hertford Co. As the HENRY LEE and JOHN LEE just mentioned were both from Surry Co. they could be related. And because of the similarity of names they could also be related to the LEEs which are the subject of this research. Any connection has not been definitely established.

TABLE II

LEES IN MANEY'S NECK AREA OF NORTH CAROLINA

This area is on the west side of Chowan River and north side of Meherrin River and bounded on the north by the Virginia line. It is actually only a few miles from where the LEE's lived on Somerton Creek. The area has been part of four counties as follows:

1. Chowan Co. up to 1722. The Chowan records contain practically nothing on this area. It could have been considered a part of Virginia.
2. Bertie Co. 1722 - 1741. Patents, land transactions and CPQS minutes are about all the Bertie Records available for this area.
3. Northampton Co. 1741 - 1759. Only land transactions available.
4. Hertford Co. 1759 - to present. Nothing available before 1865.

The following patents and land transactions have been abstracted:

1. 1723 26 March. NC LAND PATENTS-ABSTRACTS. #2041, page 127.
GODFREY LEE patented 540 acres on west side of Chowan River on the south side of Indian Creek joining Richard Holland and the said creek. (lapsed in Edward Barnes name 1 Aug. 1727)

2. 1723 26 March NC LAND PATENTS-ABSTRACTS. #2042, page 128.
GODFREY LEE patented 345 acres on west side of Chowan River joining Chowan River pocosin and a spring on the west side of Miery Marsh.

3. 1723 26 March NC LAND PATENTS-ABSTRACTS. #2047, page 129.
Joseph Ballard and John Gay patented 365 acres on the west side of Chowan River on a branch that runs into the Miery Meadow joining Richard Holland, GODFREY LEE and the Great Branch.
(Lapsed in name of James Manny and Jos. Ballard Jr. 1726.)

4 1723 26 March NC LAND PATENTS-ABSTRACTS. #2055, page 131.

Richard Holland and Edward Barnes patented 460 acres on west side of Chowan River on the west side of the Miery Meadow joining Joseph Ballard, John Gay, John Davison, GODFREY LEE, and the meadow by a spring and a beginning branch.

5. 1723 26 March. NC LAND PATENTS-ABSTRACTS. #2044, page 128.
JOHN LEE patented 600 acres on west side of Chowan River on the north side of the Indian Creek joining John Hooks, the Creek swamp and the Virginia line.

V

The second area on the west side of Chowan River in which there was a concentration of LEE's was in the Wiccacon Creek area. This creek is south of the Meherrin River and flows into Chowan River. The LEEs initially lived on Brooks Creek which is in the neck between the Wiccacon River and Chowan River and is shown as (3) in Figure 1. This area is approximately 14 miles south of the area where the LEEs lived on Cypress Swamp in Chowan Co. The area was in Bertie Co., even after Northampton Co. was formed in 1741, but was mostly in Hertford Co. after 1760. Because of this, deeds available up until the time HENRY LEE bought land in 1763 have been studied.

WILLIAM LEE first appears in the area in 1726 when he buys 200 acres of land. All the other LEEs in this area probably descended from WILLIAM. The lineage based on information found in these deeds is shown in Figure 4. This is probably the WILLIAM LEE of Bertie Co. who later sold land on Cypress Swamp that JOHN LEE had patented in 1694. This would indicate that WILLIAM was a descendant, most likely a son of JOHN LEE. There was one appearance of WILLIAM LEE in the Cypress Swamp area when he witnessed a deed in 1725 in which Charles King bought land from John Daverson. Because the first land purchase on Brooks Creek was in 1726 this could well be the same WILLIAM LEE. And there does not appear to be any other WILLIAM LEE in Bertie Co. This area became a part of Hertford Co. in 1760 and is not too distant from the Indian Creek and Somerton Creek areas where other LEEs lived. There does not appear to be a HENRY LEE connection with the WILLIAM LEE or his descendants in the Wiccacon Creek area. The identity of the children of THOMAS LEE who died in 1751 was obtained from his will filed in Bertie Co. in 1752.

LEES IN WICCACON CREEK AREA OF NORTH CAROLINA

The Wiccacon Creek area of North Carolina is on the west side of and joining the Chowan River. The area was initially a part of Chowan Precinct but after 1723 became a part of Bertie Precinct. This area remained a part of Bertie County even after Northampton Co. was formed in 1741. When Hertford Co. was formed in 1760 all of Wiccacon River was included in the county. Some of the tributaries upon which the LEEs lived, such as Barbecue Swamp and Chingapin Swamp extended into Bertie Co. As no records for early Hertford Co. exist, information after 1760 will be found only for those living south of the line in Bertie Co.

JOHN LEE and JAMES LEE patented land in the area of the Morattock (Roanoke) River as early as 1719. JOHN LEE obtained three patents totaling 1580 acres and JAMES LEE patented 380 acres. A listing of the land transactions involving JOHN LEE and JAMES LEE may be found in Table IV. By 1734 JOHN LEE begins selling this land and a sale in 1740 shows that JOHN LEE and MARY, his wife, are residents of Edgecombe Co.

The Roanoke River land transactions are mentioned because of the name JOHN LEE. It could not be determined what connection he had with the LEE's who lived in the Cypress Swamp-Somerton Creek area of Chowan Co. The area along the Roanoke River was a long distance from the Virginia line and the area was never a part of Hertford Co. It appears that the LEEs mentioned in these deeds migrated a short distance to Edgecombe Co. It must also be remembered that two other LEEs, namely JOSHUA and RICHARD, who had roots in the Cypress Swamp area also ended up in Edgecombe Co. This is a natural migration route for settlers on the eastern seaboard as land was constantly being opened up in a westward direction. It is quite possible that JOHN LEE has a connection with these LEEs. Certainly it would be expected that JOHN LEE would have descendants bearing his name. There is, of course, a continuous line of JOHN LEEs living in the area along the North Carolina-Virginia line and in areas that were later parts of Hertford Co.

The records of land transactions in Edgecombe Co. involving the LEEs are available and are rather extensive. These will not be dealt with here as they involve relatives of HENRY LEE, not his ancestors. Edgecombe Co. wills show that RICHARD LEE died in 1752, SOLOMON LEE in 1762, JOSHUA LEE in 1777, and JAMES LEE in 1777.

VII

In 1763, HENRY LEE purchased 200 acres in Bertie Co. from Jonathan Standley. The land was on the north side of Casia Swamp between said Standley and James Harrell. The deed stated that HENRY LEE was from Hertford Co. and that he was a taylor. Four years later James Harrell sold HENRY LEE 74 acres of land in Bertie Co. in the fork of Cashy and Wattom and all the part on the west side of Poplar Branch near Wattom Swamp. This deed was witnessed by John Sholar. In this deed HENRY LEE is purchasing land from his neighbor James Harrell, land that almost certainly joined the 200 acres he had purchased in 1763. John Sholar is the father-in-law of HENRY LEE, the father of HENRY LEE's wife, SARAH.

This HENRY LEE is the same HENRY LEE who was living in the western part of Chowan Co. in 1759 and was one of those petitioning the governor of North Carolina to form a new county because of the distance of the residents from the county seat. The petition states "To his excellency Arthur Dobbs, Esquire, Goyernor, the members of his majesty's Honourable Council, the Honourable Mr. Speaker and the rest of the Members of Assembly on North Carolina now met in General Assembly.

"The Petition of Sundry Inhabitants of the Counties of Chowan, Bertie, and Northampton Humbly Sheweth

"That the Inhabitants of the Western Part of Chowan County and the Northern Part of Bertie County and the Easternmost Part of Northampton County are very remote from their Respective Court Houses Which renders it very grievous and Burthensome to them to attend their Several and Respective Courts of Justice General, Musters, Election of Burgesses and Vestrymen, etc.

"Which grievance they Humbly Conceive may be Remedied by Legislative Power by Erecting those three Remote and Suffering Parts into one New County,etc."

The petition then proceeds with the signatures of the petitioners of

each of the three counties. The list for Chowan County includes JOHN LEE and HENRY LEE. As mentioned earlier this authentic signature was compared with signatures of HENRY LEE of Bertie Co. who made a will in 1803 and who was bondsman when his daughter ABIGAIL LEE married William King. The three signatures are identical and copies of the three documents may be found in the Appendix. There was a HENRY LEE living in Gates Co. also during the later part of the eighteenth century. This HENRY LEE could have conceivably been the petitioner in 1759 as the area of Gates Co. in which he appeared in 1779 was also a part of Hertford Co. up until 1779. Authentic signatures of this HENRY LEE were obtained and compared with the one on the petition. The signatures are not the same. Signatures of HENRY LEE of Gates Co. may also be found in the Appendix.

The fact that HENRY LEE who bought land in Bertie Co. in 1763 was a petitioner from western Chowan Co. in 1759 proves that he was living in that area in 1759. One other mention is made of HENRY LEE in Chowan Co. In 1754 he was a member of Captain Charles King's Co. of Militia along with JOHN LEE and JOHN LEE Junr. who were almost surely his brother and father. This will be discussed later. The sequence of events leading to HENRY LEE buying land in Bertie County in 1763 will be discussed and a possible reason presented.

What I intend to do is present a sequence of land transactions in Chowan County and in Bertie Co. which, along with information already available from an extensive study of the genealogy of the Kings living in the area, will offer an explanation for the presence of HENRY LEE in Bertie Co. in 1763. This will also substantiate that he was a resident of Chowan Co. previous to this. These land transactions may be found in Table V, along with the will of John Sholar.

The sequence of events are as follows:

1. In 1736, John Sholar, who later becomes the father-in-law of HENRY LEE, bought 135 acres of land on the N.E. side of Cashy Swamp. In subsequent

years he bought additional land in the same area. John Sholar died in 1791 and mentions his daughter SARAH LEE, wife of HENRY LEE. The land that he disposes of in his will is described as being on the north side of Wattom Swamp. The Cashie Swamp-Wattom Swamp area is shown on Figure 1 as (4). This area is just north of and adjoins the Rocquist Creek area where the Kings lived in Bertie Co. and near where the William King house was located.

2. In 1753 in Chowan Co., on Cypress Swamp, Charles King gave his son Solomon King 460 acres of land. This is the same Solomon King who died in 1794 and left a Bible record. In this record he gives the King genealogy. This Bible record is well known and will not be presented here in its entirety. He gives the date of death of his father-in-law JOHN LEE, his brother Henry King and his father Charles King. Other dates and genealogies are mentioned but are not pertinent to this presentation. The wife of Solomon King was ABIGAIL who was the daughter of JOHN LEE who died in 1770.

I have previously mentioned, but should emphasize that JOHN LEE and Charles King were neighbors on Cypress Swamp. Charles King was living on land that was patented by his father William King in 1703 and JOHN LEE on land patented by his father JOHN LEE in 1694 and thereafter. This is most certainly the JOHN LEE who has been shown to have a continuous presence in the area. He is the father of ABIGAIL LEE, wife of Solomon King. He is surely the father of HENRY LEE who also signed the petition in 1759. When HENRY LEE named his daughter ABIGAIL he was naming her after his sister.

3. In 1754 Henry King, son of Charles King of Chowan Co. bought 300 acres of land in Bertie Co, on Cashie Swamp in fork above John Wimberley from Nicholas Skinner. The deed states that Henry King is the son of Charles King of Chowan Co. He is therefore the brother of Solomon King who lived in Chowan Co. and who was also the son of Charles King. It is significant that the land he bought is in the same area where John Sholar lived. The land was on the Cashie Swamp and adjoined John Wimberley. As shown by John Sholar's

will two of his daughters married Wimberleys. The deed was witnessed by Ezekiel Wimberley, Charles King Junior and William King. The two Kings were residents of nearby Rocquist Swamp area. This was, in fact, the William King who built the King house in the area the previous year.

4. In 1758 Henry King obtained additional land in Bertie Co. from Lord Granville. This land was also on Casia Swamp and it will be shown that it adjoined land that he already owned.

5. In 1759 an unusual but very well documented event occured. The two brothers, Henry King and Solomon King, exchanged land. The Chowan Co. deeds show that Solomon King of Chowan Co. sold Henry King of Bertie Co. "all that plantation whereon I now live which was gratiously given to me by my father Charles King and by deed of gift dated 17 April 1753 - 460 acres." The deed was witnessed by Charles King and Henry King Senr.

The same year "Henry King of Bertie Co. sold Solomon King of Chowan Co. - my plantation in Bertie Co. on the south side of Casia Swamp which I purchased of Nicholas Skinner 8 June 1754 and now holding by virtue of an indenture deed made the 20th day of April 1758 from the right Honorable Lord Granville." The deed was also witnessed by Charles King.

These transactions are very important to my thesis. When Solomon King bought land from his brother in Bertie Co. he became a neighbor of John Sholar. If HENRY LEE is indeed the brother of Solomon King's wife ABIGAIL then he would most certainly have occasion to visit them and have opportunity to meet SARAH SHOLAR, their neighbor, who later became his wife. And remember that these exchanges of property by Solomon King and Henry King were in 1759. HENRY LEE could certainly have been a resident of Chowan Co. on Cypress Swamp in 1759 when the petition was signed and in Bertie Co. in 1760 and thereafter. Previous to the time when Henry King purchased the land in Bertie Co. in 1754 he was a neighbor of HENRY LEE on Cypress Swamp in Chowan Co. HENRY LEE

could even have visited Henry King in Bertie Co. and met Sarah Sholar before 1759. HENRY LEE and SARAH SHOLAR could have conceivably been married as early as 1754.

Although it will later be brought out, it must be remembered that William King, the son of the above Henry King, married ABIGAIL LEE, the daughter of the above HENRY LEE in 1791. The two parents were certainly neighbors on Cypress Swamp in Chowan Co.

6. As already mentioned HENRY LEE first bought land in Bertie Co. in 1763. The land was in the same area as John Sholar and Solomon King - on the north side of Casia Swamp. The land was near both his sister, ABIGAIL, wife of Solomon King, and his father-in-law, John Sholar. It is not known when HENRY LEE and SARAH SHOLAR married. HENRY LEE bought land for his son, JOHN SHOLAR LEE, in 1775. The fact that the land was bought for JOHN instead of by him indicates that he was not yet of age. He could have been any age, but most likely of an age to live on the land. If this is true then it is quite possible that HENRY LEE and SARAH SHOLAR were married by 1759 or perhaps even earlier. An earlier date would indicate that HENRY LEE met SARAH through visits to Henry King, not to Solomon King and his wife ABIGAIL.

7. In 1766 Solomon King and his wife ABIGAIL sold the 260 acres on Casia Swamp to Absalom Carney. The Bertie Co. deed refers to Solomon King of Hertford Co. and ABIGAIL his wife. It cannot be determined when Solomon and ABIGAIL returned to Hertford Co. and if he bought land there at the time. Records of Hertford Co. are not available. The area of Hertford Co. to which Solomon returned was the area on Cypress Swamp where the Kings had previously lived and were still living. It could have been to land inherited from his father, Charles King, who died in 1762. Both Solomon King and Henry King, at their deaths, were still living in the same area as their grandfather,

William King, who patented land on Cypress Swamp in 1703.

8. Mention has already been made of the fact that HENRY LEE bought land for his son, JOHN SHOLER LEE, in 1775. This land was described as being in the fork of Cashie and Wattom Swamps. Additional deeds are available for the LEEs of this area but will not be dealt with here as they serve only to show HENRY LEE's descendants, not his ancestors. All land mentioned is on Cashie Swamp. These transactions may be found in Table V.

9. One deed, however, is of sufficient interest to be mentioned. JOHN LEE and ABIGAIL his wife of Nansemond Co. VA sold William King of Gates Co. 225 acres in Bertie Co. in 1792. This was the year after William King of Gates Co. married ABIGAIL LEE, daughter of HENRY LEE of Bertie Co. The land is described as adjoining HENRY LEE and was on Wattom Swamp. William King sold this land the next year. It is not known whether or not William actually lived on the land. He was a resident of Gates Co. when he married ABIGAIL LEE in 1791 and appears prominently in the records of that county until moving to Guilford Co. in 1800. Because the land adjoined HENRY LEE it must be assumed that the JOHN LEE selling the land was the son of HENRY LEE and that this was land purchased for JOHN LEE in 1775. This shows that JOHN LEE, son of HENRY LEE of Bertie Co. has moved to Nansemond Co. VA. He could have been returning to the area where the LEEs were living along the Virginia-North Carolina border or he could be further north in Nansemond Co. This will be more fully explored later when dealing with HENRY LEE of Gates Co.

10. In 1797 JOSHUA LEE, son of HENRY LEE, bought land in Guilford Co., NC. Before leaving he sold the 150 acres on Cashie Swamp given to him by his father. This sale was in 1796. What I wish to show is that the deed was witnessed by his brother HENRY LEE Junr. In 1801 HENRY LEE joined his son JOSHUA LEE in Guilford Co. Before leaving he sold his

land to his son, HENRY LEE Junr. of Bertie Co. The deed was between HENRY LEE Senr. and HENRY LEE Junr., both of Bertie Co. for 159 acres of land on Cashy Swamp. HENRY LEE Junr. remained in the same location and acquired additional land in the same area. HENRY LEE Junr. died in 1822. His wife ANN received dower of 249 acres in the fork of Cashy and Wattom Swamps. This information is not pertinent to finding the ancestors of HENRY LEE of Bertie Co. It is presented, however, with a purpose - to show that the HENRY LEE who married Anna Freeman and died in 1822 was the son of HENRY LEE of Bertie Co. This will be more fully discussed later.

A probable lineage chart of the descendants of JOHN LEE who first patented land in Nansemond Co. is shown in Figure 3.1 P.23 This chart has been constructed based on information found in the numerous land transactions. There are no wills for any of the JOHN LEEs even though there appear to be at least four of them. When HENRY LEE signed the petition from Chowan Co. in 1759 the only other LEEs in the county were JOHN LEE and JOHN LEE Junr. JOHN LEE had to be his father. The JOHN LEE connection not conclusively proved is the connection between the JOHN LEE who died in 1739 and the JOHN LEE who died in 1770. Because there is a JOHN LEE constantly living in the area but no other LEE until 1754 the probability is strong that JOHN LEE who died in 1770 is living on land patented by his father. There is also the possibility that this is the JOHN LEE patenting land in 1720. The lineage shown is the best that can be shown with information available.

I have presented the chart of WILLIAM LEE of Bertie Co. separately. Dates of death of some of those mentioned would fit better if this WILLIAM LEE were the brother of the JOHN LEE who died in 1739 rather than a son. It is also possible that RICHARD LEE is also a brother of the same JOHN LEE as he was living on land patented by JOHN LEE in 1694, before the death of JOHN LEE in 1739.

The lineage as it pertains to HENRY LEE who married SARAH SHOLAR has a high probability of being correct. I shall discuss the other HENRY LEE separately.

IX

In Chapter VII evidence was presented to show that HENRY LEE of Bertie Co. was the son of JOHN LEE who lived in the Somerton Creek area and died in 1770. There was also a HENRY LEE who lived in Gates Co. after 1779 and died there in 1806. I believe he is also a descendant of this same JOHN LEE and I will attempt to show a connection. Because of the absence of records of Nansemond Co. VA, this is not an easy task. Both HENRY LEE who later bought land in Gates Co. and his father, JOHN LEE Junr. appear to have been residents of the Virginia side of the dividing line between the two states.

HENRY LEE of Gates Co. married Elizabeth Pipkin in 1779. There is no record of HENRY LEE prior to 1779. This could be because the area was part of Hertford Co. and records are not available. It could also be because HENRY LEE was not of age and not a landowner before his marriage. The first mention of a purchase of land in Gates Co. was in 1780, the year after his marriage, when he purchased 110 acres on Beaverdam Creek from Aaron Odom. In the first tax lists of Gates Co. on which he is mentioned, 1784, he paid taxes on 110 acres. The inference is that he had no other land prior to this purchase. This would preclude that he had inherited land in North Carolina. There is no mention of his probable father, JOHN LEE, as a land owner in Gates Co. The only other landowner is a LEVI LEE whose connection, if any, to HENRY LEE has not been determined. Deeds in which HENRY LEE bought land or is mentioned have been grouped in Table VI, p. 66.

The militia list for Chowan Co. for 1754 shows a JOHN LEE, a JOHN LEE Junr. and HENRY LEE. I believe this HENRY LEE is the same one who signed the petition in 1759 and later moved to Bertie Co. JOHN LEE Junr. and HENRY

LEE appear to be brothers and sons of JOHN LEE. JOHN LEE Junr. appears to be older than HENRY LEE. He bears his father's first name and appears on the tax lists after 1754. I believe this JOHN LEE Junr. is the father of HENRY LEE who appears in 1779. He names a son after his brother HENRY. Evidence strongly supports this connection, however, I have found no conclusive proof. The elder JOHN LEE was also the father of ABIGAIL LEE who married SOLOMON KING.

HENRY LEE remained in Gates Co. and died there in 1806. He purchased additional land as shown in Table VI. In 1783 he purchased an additional 110 acres of land. From that year until 1792 he paid taxes on 185 acres, not 220 as would be expected. HENRY LEE lived near the dividing line between North Carolina and Virginia. It is possible that 35 acres of land was in Virginia and he paid no North Carolina tax on this. He bought an additional 353 acres in 1793 from James Reddick and the land on which he paid taxes increased by this amount. He bought 275 acres from John Long in 1795 and again the number of acres on which he paid taxes increased by the same amount. From 1796 until his death he paid taxes on 815 acres even though he apparently bought a small amount of additional land in 1800.

HENRY LEE died intestate in 1806. His land was divided up among his 12 children. The division is described in the deeds of Gates Co. of 1807. These deeds have been abstracted. A copy of the abstract pertaining to the land division can be found in Table VII. The division among the twelve children was of 1050 acres. 180 acres of this was definitely in Virginia. This leaves 870 acres in Gates Co. and part of this appears to be in Virginia also. HENRY LEE was probably correct when he paid taxes on 815 acres in North Carolina. But that leaves 235 acres in Nansemond Co. This will be discussed later.

The information found in Table VII along with information obtained to deeds of adjoining landowners have been used in an attempt to pinpoint the

location of the land where HENRY LEE lived. The division into twelve parts is shown in Figure 5. The land appears to fall into four separate areas. An area of 110 acres including survey No. 1 and part of survey No. 2 appears as though it could be partly in Virginia. This could be the missing 35 acres. The division states that HENRY LEE lived on the area of Survey No. 1. This means that he lived on Beaverdam Creek near the Virginia line. POLLY LEE received this portion in the division. The second block appears to join the land on which HENRY LEE lived and to also be on Beaverdam. The last two large purchases made by HENRY LEE are east of Beaverdam and include some branches of Beach Swamp. The two purchases were adjoining and were divided among seven of the children. Between surveys 2 and 3 and surveys 6 and 7 is a piece of land of 333 acres purchased by William Goodman in 1796. The parameters of this purchase are not sufficiently definite to establish the exact distances between the parts of HENRY LEE's land. The location of all surveys shown in Figure 5 is only approximate. They are not absolute. They have been placed on Figure 5 for one reason - to show that this is not land patented by JOHN LEE in 1694. It could have conceivably been the 1720 patent or a purchase. This does not, however, appear in the records.

Surveys No. 4 and 5 were on the north side of Somerton Creek. I have shown a probable location of these two surveys in Figure 5. The contours of Somerton Creek at this point is such that the two surveys fit reasonably well except that the acreage in this bend is somewhat larger than that in the two surveys. It is quite possible that Somerton Creek is narrower today than in 1807 and that the acreage in the bend has been thus enlarged. It is also possible that the location of these two surveys on Somerton Creek is at some point further west. I tend to believe this is the right area because it fits the contours mentioned in the 1807 division fairly well and because of the close proximity to other land of HENRY LEE.

Mention should be made of a deed from Jesse Saunders to Bray Saunders in 1795 and a deed from Bray Saunders to Bryant Saunders in 1800. The land involved adjoins both HENRY LEE on the south and Somerton Creek on the north. Bryant Saunders is shown as a neighbor of HENRY LEE in the 1807 land division and is just below the Virginia line. The land being bought extends to Somerton Creek which is 300-400 yards north of the border. What is involved is a Gates Co. deed for land both in North Carolina and Virginia. It is quite likely that the adjoining land of HENRY LEE which becomes part of Survey No. 1 is also partly in Virginia. It is quite likely that other residents along the dividing line between the two states have land in both Nansemond Co. and Gates Co. The general area in which HENRY LEE lived is shown as (5) in Figure 1.

I have speculated that JOHN LEE is a brother of HENRY LEE of Bertie Co. and ABIGAIL LEE KING of Gates Co. This is the same JOHN LEE referred to as JOHN LEE Junr. before the elder JOHN LEE died in 1770. There does not appear to be a JOHN LEE living in Gates Co. from 1779 when the county was formed from Hertford Co. until the death of HENRY LEE in 1806. There is a JOHN LEE referred to in the records but he appears to be a resident of Nansemond Co. Reference is made to JOHN LEE in 1792 when Solomon King had three deeds of trust for the benefit of certain of his grandchildren. JOHN LEE was one of the trustees and was referred to as a trusted friend. The exact relationship was not given. Also in 1792 JOHN LEE of Nansemond Co. sold a horse to Solomon King's granddaughter, Rebecca King Valentine. This could well be the same JOHN LEE who was trustee and he could well be Solomon King's brother-in-law. The deed involving the sale of a horse locates JOHN LEE in Nansemond Co. in 1792.

Another deed in 1795 also locates JOHN LEE in Nansemond Co. In fact it locates him in the same area as the land HENRY LEE owned north of Somerton Creek at his death. The deed in question is also in Table VI. It is a deed previously referred to in which two tracts of land were sold by Uriah and John Odom to Jethro Sumner of Nansemond Co. One tract has been previously used to locate a JOHN LEE the elder and a younger JOHN LEE in 1717. The second tract locates a JOHN LEE in 1795. The deed states "One piece being purchased by Richard Sanders of JOHN LEE containing 100 acres by deed dated 18 Nov. 1795 it doth appear on records of Nansemond Co. VA. In 1795 JOHN LEE is selling land in the same general area in which the two other LEEs lived in 1717. The land divided in 1806 mentioned Demsey Sumner

as a neighbor on the north side of Somerton Creek. This Demsey Sumner could be related to the Jethro Sumner mentioned in the 1795 deed. It is possible that JOHN LEE, brother-in-law of Solomon King, and HENRY LEE had adjoining land on the north side of Somerton Creek. This could well be where HENRY LEE lived before he married Elizabeth Pipkin in 1779. The area north of Somerton Creek is only a short distance from where the Pipkins lived in Gates Co.

The evidence presented here shows that HENRY LEE had land in Virginia on Somerton Creek. His presence in this area would strongly suggest that he was descended from the JOHN LEE who patented land there in 1694. The JOHN LEE referred to as being present in 1792 and 1795 is the only other LEE found in this area. This suggests but does not prove that this is the father of HENRY LEE. Information is not sufficient for a conclusive connection.

It must also be remembered that JOHN LEE, son of HENRY LEE of Bertie Co. was also a resident of Nansemond Co. when he sold his land in Bertie Co. to William King. There is the possibility that this is the same JOHN LEE mentioned as trusted friend of Solomon King and who sold the horse. There could easily have been two JOHN LEEs in Nansemond Co. and conceivably in the same area. I have not been able to resolve this issue.
